265 Acres – Prime Farmland & Former Feedlot – Just West of Saskatoon, SK

An exceptional opportunity to acquire 265 acres of grain farmland located just ½ mile from the west boundary of Saskatoon. This versatile property offers agricultural potential, valuable infrastructure, and a prime location for investment or development. This property is ideal for continued agricultural use, agribusiness expansion, or investment purposes. With city water, rail access, and proximity to major industrial operations, this is a rare find near Saskatoon.

Property Highlights:

- 265 acres currently in grain production; historically used as a feedlot.
- Independent city water line to the property.
- 3-phase power available adjacent to the land.
- CN Rail line borders the south side of the property – ideal for logistics or agribusiness.
- Located just south of DG Global West Inc., and only 1.5 miles from the PotashCorp mine entrance.
- Paved access from the north via Twp Rd 364.
- Excellent proximity to Saskatoon – easy access via 11th Street West and Hwy 7.

Residence & Outbuildings:

- **Bungalow Residence (1,274 sq. ft.)**, built in 1940, includes a 17.5' x 27' attached garage.
 - **Red Barn / Shop (40' x 90' plus 27' x 14' addition)**, asphalt shingles, cement foundation & floor, 110V and 220V power, propane forced-air heat, divided into 4 main floor rooms, with solid upstairs loft designed for heavy storage, reinforced metal-sheet flooring – ideal for equipment or grain storage
 - **White Barn (34' x 128')**, asphalt shingles, cement floor, includes power and partial hay loft
 - **Guard House (20' x 20')**, stucco finish, metal roof, power, currently used for storage
- Numerous additional outbuildings, corals, and cement slabs provide flexibility for livestock, equipment, or future development (no added value).

Average per 160 acres \$411,894

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
